

Product warranty is void if product is not installed as per installation instructions and in compliance with all local and provincial codes.

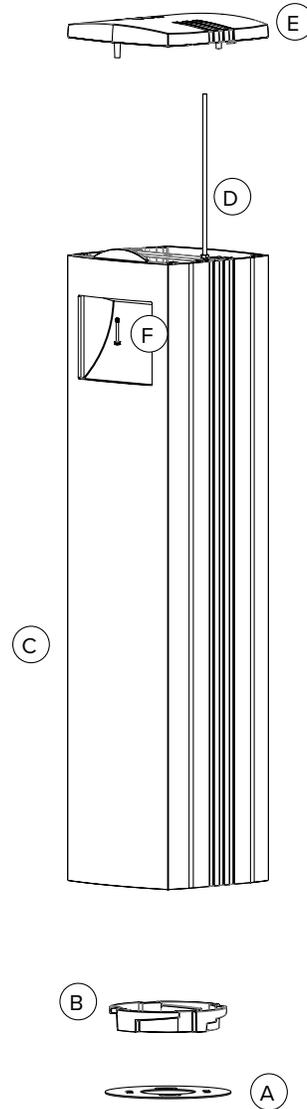

READ ALL SAFETY INSTRUCTIONS FIRST

- › Follow instructions carefully; failure to do so will void warranty.
- › Qualified personnel must install product in a manner consistent with its intended use and in compliance with all local laws and provincial codes.
- › Follow all product label information and installation instructions.
- › Qualified personnel must perform all servicing of this product.
- › Turn off power at fuse or circuit breaker before installation or servicing.
- › The use of damaged components may cause an unsafe condition and void the product warranty.
- › Do not block light emanating from the product in whole or part.
- › Never operate the luminaire with a missing or damaged lens. The lens must be cleaned on a regular basis.
- › Portions of the luminaire may become extremely hot. Do not touch the hot lens or luminaire body. Do not touch the light source at any time.
- › Keep all gaskets and sealing surfaces clean during installation and servicing; failure to do so may lead to premature failure of the product.

Products and specifications are subject to change without notice.

Product Overview

- > Suitable for mounting within 4' (1.2 m) off the ground.
- > Vapor barrier must be suitable for 194 °F (90° C)
- > For use in non-fire rated installations only
- > Not for use in environmental air handling spaces

COMPONENT LIST

A	Isolator
B	Mounting Base
C	Bollard
D	Threaded Rod
E	Top Cap
F	Set Screw

Tools Required

Installation: $\frac{3}{16}$ " $\frac{7}{16}$ " wrench or socket, and $\frac{5}{32}$ " Allen wrench
 Servicing: #2 Phillips screwdriver

Products and specifications are subject to change without notice.

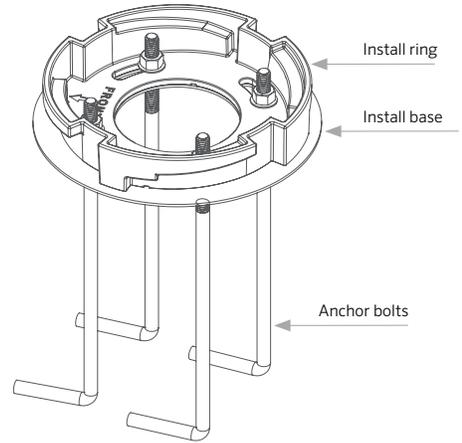

Installation Instructions

Step 1

Assemble the install base, isolator and 3/8" anchor bolts (included) to prepare for installation in a concrete base.

Aim the small arm section of each anchor bolt outward to create a star pattern for the strongest installation.

Be sure to follow local codes and structural guidelines for sizing of the concrete foundation.

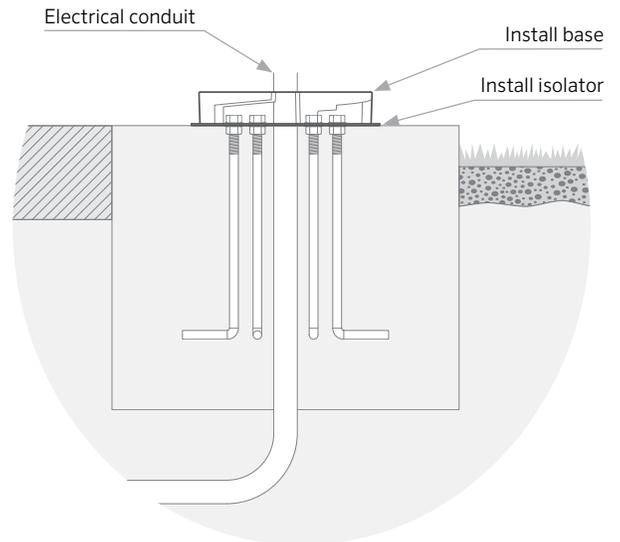

Step 2 & 3

Plumb conduit/cabling through the center of the install base.

Reduce gap.

Ensure the base and install isolator are flush with the concrete surface.

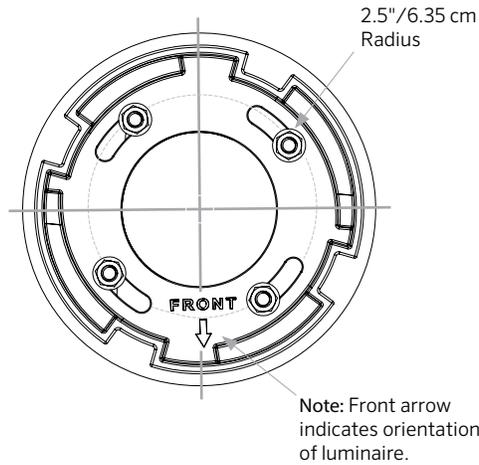

Products and specifications are subject to change without notice.

Installation Instructions (cont'd)

Step 4

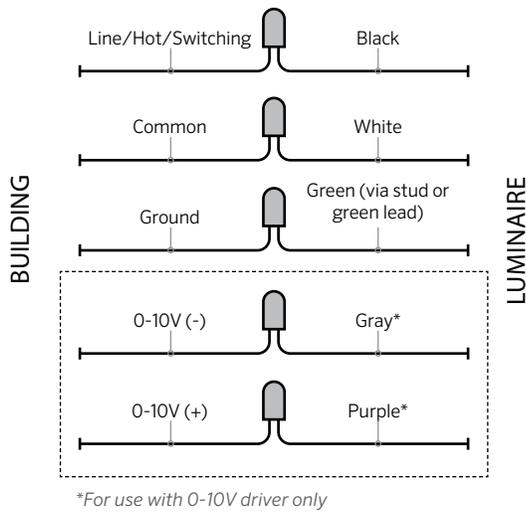

Align arrow in the desired lighting direction.

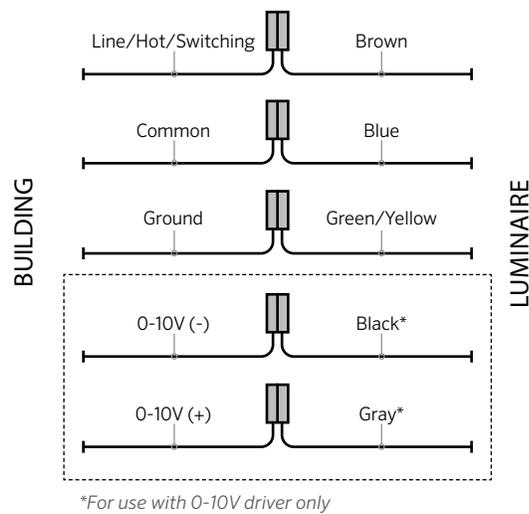

Step 5

Carefully support the luminaire while connecting the wires. Be sure to use the appropriate wiring chart and approved wire connectors.

Wiring Chart (North America)

Wiring Chart (International)

Installation Instructions (cont'd)

Step 6, 7 & 8

Lift the luminaire assembly and lower it onto the mounting base assembly.

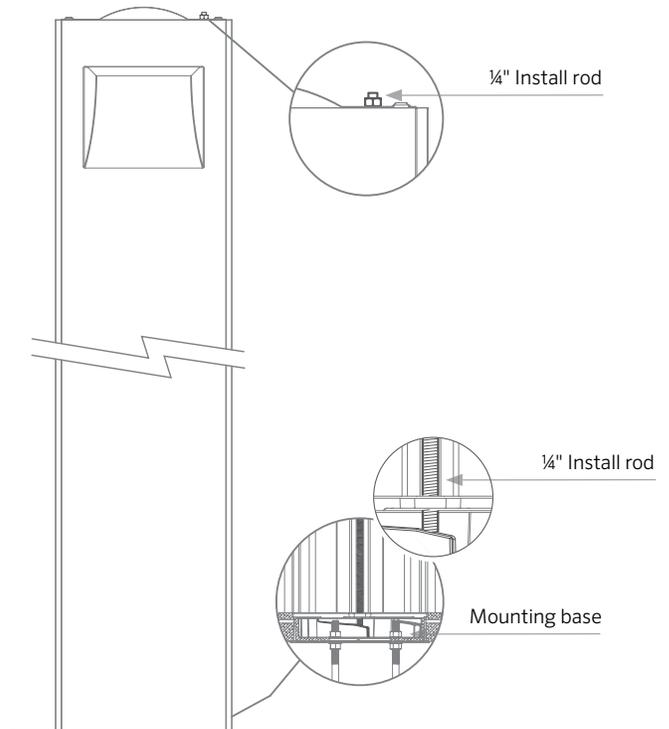

Align the four tabs in the bottom of the bollard with the grooves in the install base.

Hand-turn the main assembly clockwise 45° until the main assembly locks in place.

Step 8

Lock the main assembly in place by tightening the 1/4" install rod at the top of the main assembly until it bottoms out on the mounting base.

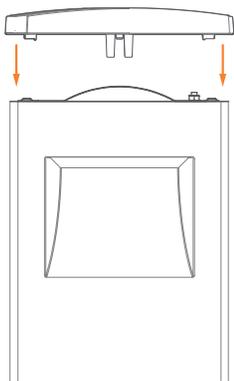

Products and specifications are subject to change without notice.

Installation Instructions (cont'd)

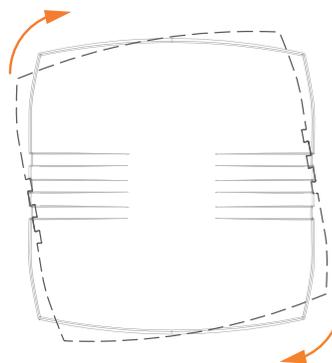

Step 9

Place the cap on top of the main assembly.

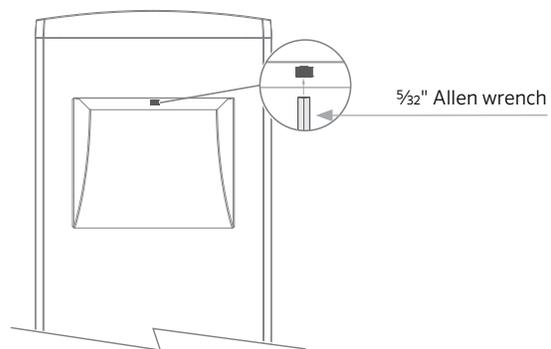

Step 10

Hand-turn the cap clockwise until the tabs engage and lock the cap in place.

Step 11

Using a $\frac{5}{32}$ " Allen wrench, tighten the 10-32 setscrew at the underside of the light opening to lock the top cap in place.
